

Environmental Policy

VirTex Enterprises is an Eco-Friendly factory that is committed to our community and promises to protect the environment, prevent pollution, and mitigate our environmental carbon footprint.

VirTex strives to do this by compliance to both RoHS (Restriction of Hazardous Substances in electric and electronic equipment) and WEEE (Waste Electrical and Electronic Equipment) directives alongside implementing robust recycling programs.

VirTex is committed to protecting the environment and is in compliance with local, state and federal requirements along with ISO 14001. VirTex is continually improving its process and is constantly working to create a sustainable tomorrow for future generations.

VirTex has implemented several environmental programs including:

Waste Reduction & Recycling Programs:

- All paper waste.
- All corrugated box waste.
- Internal office paper waste.
- PCB Scrap.
- Lead & Lead-free solder.

Energy Management:

- During the winter months, heat generated from our machines is exhausted into the building for heating.
- Energy conservation programs are executed during the summer months to help cut energy use.
- A Closed-loop watering system is in place on some of our machines. (to keep it from entering our local waste water system)

Scrap management:

- VirTex uses our robust supply chain to exchange excess components
- VirTex properly disposes of all hazardous waste and materials and complies with all mandated requirements.

VirTex is focused on improving the energy efficiency of its building and has set in place an energy conservation practice that are to be followed by all employee's, to raise awareness of energy consumption.
